AIR FILTER OIL

Lubricant for air filter moss

USES

AIR FILTER OIL is designed to prevent clogging of road and off-road motorbikes engines equipped with an air filter moss.

Tested and proven in competition, this product is convenient for leisure or racing purposes.

Can also be used on air filter moss of gardening equipment.

PROPERTIES & ADVANTAGES

- Excellent **impregnation capability** in the moss
- Creates a very efficient **protection** against dust, mud, sand and any kind of outside pollution.
- Decreases significantly the general **engine wear**
- Keeps clean the different engine parts even after severe driving conditions.
- Extend the engine's life
- Dyed blue for easier identification on the surface of the filter.

OPERATING PROCEDURE

1. Clean up the filter with a solvent adapted to air filter moss (do not use gasoline)
2. Let the filter dry
3. Spray gently AIR FILTER OIL directly on the moss.

CAUTION USE

Not for use on paper filters
