

PATE ALU

Anti-seize aluminium paste

USES

Lubricating and greasing aluminium paste suitable for use in extremely hot conditions (effective at temperatures exceeding 500°C).

Allows metal assemblies exposed to extreme temperatures to be easily dismantled.

MAIN PHYSICAL DATA

	Values
Appearance	Aluminium
Colour	Grey

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Prevents rust formed by thermal, atmospheric and chemical phenomena.
- ▶ Can be used to replace copper-based anti-seize products when these may produce an unwanted chemical reaction.
- ▶ Ideal for outdoor equipment exposed to corrosive environments (coastal, industrial, etc.).
- ▶ Very good resistance to water.

INSTRUCTIONS FOR USE

1. Shake well before use.
2. Spray evenly about 20cm from the parts to be treated.
3. Drain the aerosol head down after use.

Before use, carefully read the safety label on the packaging and/or check the Health and Safety Data Sheet available at yacco.com.
