

CLIM EN 1

AIR CONDITIONING CLEANER

USES

YACCO CLIM EN 1 is a bactericidal and disinfectant cleaning solution aerosol. This formula is virucidal, bactericidal and fungicidal according to the standards described here after.

This product stops the proliferation of microorganisms (viruses, bacteria, yeasts and molds), deodorizes and eliminates bad smells by attacking what is causing them, leaving a pleasant minty scent.

PROPERTIES & ADVANTAGES

- ▶ Virucidal activities according to standards EN14476+A2
- ▶ Bactericidal activities according to standards EN1276 / EN13697+A1
- ▶ Fungicidal activities according to standards EN1650 / EN13697+A1
- ▶ Stops the spread of microorganisms: bacteria, yeasts and molds
- ▶ Simultaneously treats the inside of the car and its air conditioning system.

INSTRUCTIONS FOR USE

1. Pull back the passenger seat and put the aerosol on the car floor.
2. Open the car's air vents.
3. With the engine running, turn on the air conditioning to maximum in "recirculation" mode.
4. Open the aerosol.
5. Close all the windows and doors.
6. Wait for 15 minutes after emptying the spray.
7. Turn off the air conditioning and open the car doors for good ventilation.

PRECAUTIONS FOR USE

- ▶ Easily flammable product.
- ▶ Keep away from flames and sources of ignition.
- ▶ Store at above 5°C.
- ▶ Use this aerosol only for its intended purposes.

Before use, follow the safety instructions on the packaging and Material Safety Data Sheet, available upon request at yacco.com.
